HOW DO YOU STAND THE TEST OF TIME? BY ALWAYS BEING A STEP AHEAD.

The Porsche 911. A legendary that has combined iconic design with the fascination of sports cars like no other since 1963. With the 911, Professor Ferdinand Alexander Porsche created an automotive design classic that still appears contemporary, more than 50 years later. That was the standard Prof. F. A. Porsche set for himself when he left the family business in 1972 and founded Porsche Design. Here, too, the motto was: get the maximum out of the minimum. Reduce the design to the essentials. Visualise icons. That is how the

Chronograph I, the world's first fully matte black watch was created, based on the low-reflection interior of the sports car. With this chronograph, Porsche Design set new design standards against which every new design from the company is still measured today. The most recent release to reach, or even surpass, those high standards is the new 1919 Globetimer UTC All Black. A natural evolution of the highest standards of design. A timeless companion.

A high-angle, close-up photograph of a person's torso and arms. They are wearing a dark, possibly black, suit jacket with a visible zipper down the center. Their hands are positioned near their waist, with the right hand slightly above the left. On the left wrist, a black Porsche Design 1919 Globetimer UTC watch is prominently displayed. The watch has a black dial with white markings and hands, and a black leather strap. The background is dark and out of focus, suggesting an interior setting like a car or a modern building.

1919 GLOBETIMER UTC ALL BLACK

Travellers should not be hindered. Rather, their travel should be made easier. That is why Porsche Design developed the 1919 Globetimer UTC – a travel watch that is now available in puristic black for the first time.

The 1919 Globetimer UTC All Black is the latest addition to the series of iconic and innovative timepieces from Porsche Design and leaves a lasting impression with its innovative performance and minimalist design. Perfect craftsmanship for your wrist that is second to none – and not only when travelling.

THE SPORTS CAR FEELING ON YOUR WRIST. IN ANY TIME ZONE.

The 1919 Globetimer UTC brings the sports car feeling to your wrist – and is always ready to travel. Derived from the simple and efficient functionality of the Porsche dual-clutch transmission, the time zone display can be adjusted every in one hour increments without losing the running time display – and all

that with the simple push of a button. There is no need to change setting via the crown, saving valuable seconds – simple and precise. The timepieces also includes automatic adaption of the date display. An innovation by Porsche Design. A revolution for the industry.

THE NEW DESIGN CLASSIC FROM PORSCHE DESIGN: BACK TO ALL BLACK.

Previously available in four different colour variants, the 1919 Globetimer UTC now appears in all black – minimalist, sporty and just as iconic. As with the Chronograph 1, the first Porsche Design watch, the coloration is inspired by the low-reflection cockpits in Porsche sports cars. The result: optimal legibility thanks to maximum contrast. What used to be revolutionary is now standard at Porsche Design. The display of the 1919 Globetimer UTC All Black can be

registered at a glance thanks to the matt black dial. Like all leather straps for Porsche Design timepieces, the matching black leather strap of the Globetimer is made of real Porsche vehicle leather. In this way, the 1919 Globetimer UTC All Black not only becomes an indispensable travel companion, but a design classic in puristic black.

ALL THE TIME IN THE WORLD: EVERY SECOND MEASURED. OUR FIVE MODELS.

The 1919 Globetimer UTC models are the ideal travel watches. After all, standing still is not an option for chronometers with sports car DNA. They are optimised for people who like to be on the move and rely on absolute precision.

There are five models to choose from: the All Black version, the youngest member of the UTC family, embodies classic Porsche Design elegance. It fits in effortlessly with the reduced aesthetics of the 1919 Globetimer UTC series and proves once again that Porsche Design never lags behind trends, but sets them.

PRECISION MADE IN SWITZERLAND.

Thanks to the Porsche Design Calibre WERK 04.110, the chronometer works with extreme precision – that has been confirmed by the Contrôle Officiel Suisse des Chronomètres (COSC), an independent inspection authority in Switzerland. The 1919 Globetimer UTC impresses with innovation and Swiss watchmaking craftsmanship from Solothurn – at the company's own watch

factory, Porsche Design Timepieces AG. There, engineers and watchmakers work side by side to ensure maximum performance out of each model. And to bring the accustomed Porsche quality not only into vehicles, but also to wristwatches. Bringing an entirely new kind of value to every second. Perfect craftsmanship on the go that is second to none.

The screwed case back of the 1919 Globetimer UTC features engraved time zones and the corresponding metropolises.
